T-Top 10" & 11"

KNOW THE DIFFERENCE. CHOOSE THE BEST.

CLASS N

- Door can be opened during Sterilization
- Premature opening = potential contamination
- Open door drying can lead to wicking
- Ideal for simple, non-porous unwrapped instruments

CLASS S

- Closed-door drying
- Data logging
- Fully Automatic
- Complies with dental ST79
- Ideal for general dental practices

T-Top 10" & 11"

CLASS B

- Pre-vacuum removes air for full steam penetration in porous & hollow loads.
- Complies with Medical ST79 and ANSI Guidelines
- Ideal for complex, porous, hollow, and wrapped instruments

T-Top 10" & 11"

WHO IS CLASS B FOR?

Oral Surgeons

OB/GYN

Ophthalmic

Orthopedics

WHY CHOOSE A CLASS B STERILIZER?

HOLLOW INSTRUMENTS LONGER THAN 8"

Ensures complete steam penetration and sterilization through the entire length.

HIGHER VOLUME PRACTICES

Handle more loads daily with confidence and efficiency.

BETTER STEAM SATURATION

Pre-vacuum technology removes air for superior steam penetration and consistent sterilization.

LARGEST & DEEPEST CHAMBER SIZE

Accommodates more instruments per load, including bulky and wrapped sets.

MAXIMUM SAFETY & COMPLIANCE

Meets the highest AAMI Standards for your protection and peace of mind.

MEETING THE HIGHEST AAMI STANDARDS.

99.8% AIR REMOVAL.

The T-Top Class B Sterilizer meets and exceeds the highest AAMI Standards—delivering 99.8% air removal for total protection and peace of mind.
